Broadcast Production Environment- With **TWO** Shure Broadcast Headset Microphones and **TWO** Whirlwind Talk Back Systems we increase the production value of your show by providing direct communications between the announcers and sound engineer throughout the show. **Increasing the entertainment value for your audience!**

Spot Production & Sponsor Support*- We can pre-produce your Sponsor spots and increase your sponsor's activation through professionally produced broadcast ready drop in spots for the PA complete with a performance affidavit! We can also work with your sponsorship committee to develop a plan that will serve your sponsors and drive revenue for your show.

* These services provided at an additional cost depending on the level of service required.

The Compact Rig
